PROFESSIONAL SUMMARY

Full Stack Software Engineer with 1.5+ years of experience building scalable enterprise applications using C#, .NET, ASP.NET Core, and React using OOPS. Experienced in designing high-performance REST APIs, optimizing SQL queries, and implementing Clean Architecture, CQRS, and SOLID principles. Proven record of improving system performance by 40%, reducing defects by 25%, and delivering reliable systems with 99.99% uptime. Strong experience working in Agile environments, mentoring engineers, and shipping production-grade systems.

TECHNICAL SKILLS

- **Languages:** C#, JavaScript, SQL, HTML, CSS, XML, OOPS
- **Frontend:** React.js, Bootstrap, AJAX, Blazor
- **Backend:** .NET, ASP.NET Core, Entity Framework Core, LINQ
- **Architecture:** Microservices Concepts, MVC, CQRS, Clean Architecture, SOLID Principles, Design Patterns
- **APIs & Integration:** REST APIs, Web API, JSON, API Integration
- **Databases:** SQL Server, MySQL, Query Optimization, Indexing
- **Dev Tools:** Git, GitHub, TFS, JIRA, Postman, Visual Studio, Cursor, Claude Code
- **Practices:** Agile/Scrum, Unit Testing, Code Reviews, Performance Optimization

PROFESSIONAL EXPERIENCE

GreenBotz Platform Pvt Ltd — Software Engineer | AUG 2025 – Present | Coimbatore

- Reduced critical workflow processing time by 40% by refactoring CRM, Tickets, Banking, and accounting modules using CQRS, OOPS and Clean Architecture.
- Improved maintainability and reduced production defects by 25% by applying SOLID principles, design patterns, and dependency injection in .NET Core.
- Engineered **scalable Restful APIs in ASP.NET Core handling 5K+ daily requests**, reducing API response latency by **20%** and improving overall application performance.
- Collaborated in Agile sprints delivering production-grade features and bug fixes improving reliability and user satisfaction.
- Leveraged **AI-assisted development tools** to accelerate coding, debugging, refactoring, and feature development, significantly improving development productivity.
- Contributed to **product enhancement initiatives** by analyzing existing workflows, identifying

improvement areas, and implementing optimized solutions across multiple modules.

- Designed and implemented an **AI-powered chatbot** to improve user interaction and provide faster access to product-related information and workflows.
- Worked closely with development and product teams to deliver **AI-driven features, performance improvements, and scalable solutions** aligned with business requirements.

Internship

Project: LearnHub

Company: MEGANAR TECHNOLOGIES

Technologies: React.js, SQL Server, Entity Framework, CQRS

- Developed an **e-learning platform** that enables users to **enroll in courses, watch video lessons, take quizzes, and receive e-certificates upon completion**.
- Designed a **user-friendly interface** with **smooth navigation** to enhance overall user experience.
- Integrated **Razorpay payment gateway** to enable **secure and seamless transactions**.
- Implemented **modular architecture using CQRS and Clean Architecture**, improving **scalability, maintainability, and system performance**.

National Stock Exchange (NSE) | Jun 2024 – Mar 2025 | Coimbatore

Prime Minister's Internship Scheme (PMIS) — Government of India

- Supported project documentation, workflow coordination, and progress reporting.
- Maintained records and assisted with project assessments and internal communication.
- Analyzed financial and market data using Excel, Power BI, and NSE Smart.

EDUCATION

Master of computer application — Ayya Nadar Janaki Ammal College, Sivakasi | CGPA: 7.04/10

Bachelor of Science (Computer Science) — Ayya Nadar Janaki Ammal College, Sivakasi | CGPA: 8.02/10

CERTIFICATIONS

- SOLID Principles — Coursera
- Data Structures and Algorithms — GeeksforGeeks
- Hackathon participant (BMI React App)
